Technical Writer / UX Writer / Documentation Engineer
Complex systems in plain words / Docs-as-Code

Summary

A decade-long tech writing journey. Spark and curiosity. Hands-on across Developer Experience, Content Strategy, and Information Architecture. Gravitate toward Docs-as-Code tools and AI-augmented workflows. Specialize in API and developer docs, end-user docs, UX copy, website content, LLM- and Agent-ready docs, visual communication through diagrams and screenshots.

Care for UX, both in docs and product interfaces. Spend endless hours with Design teams, advocating for straightforward logic and simplifying user interaction with complex systems.

Set foot into aspects of the Tech Product Marketing Manager role. Help align the Marketing team around the broader product vision, grounded in deep technical understanding and translated into clear product positioning and messaging. Craft feature announcement email send-outs communicating the essence of scheduled product releases to customers.

Industry expertise: Blockchain / Web3 / DeFi, Fintech, Process Automation Solutions, Gaming/Publishing, and Telematics / GPS Fleet Management.

How I Work

Operate best in environments that enable meaningful, strategic, product-aligned work. Believe in the freedom to shape and own the docs end-to-end: exploring product features hands-on, aligning with Product and Engineering teams, communicating complex systems with clarity and precision, and ensuring high-quality deliverables.

Among the first to raise questions and initiate constructive discussions when something feels off about the product. Easy to embed into Agile workflows across distributed teams with asynchronous communication. Curious, methodical, precise, diplomatic, and easy-going. Enjoy being around folks who love what they do.

Tech and Tools

Git, GitHub, Markdown, static site generators (Hugo, MkDocs, Docusaurus, Nextra, Fern), HTML/CSS, GitBook, Confluence, Jira, Figma, Snagit, OpenAPI/OpenRPC, YAML, JSON, Swagger, Postman, cURL, REST/RPC/gRPC APIs, Claude Code, Cursor, ChatGPT, Codex, GitHub Copilot.

Experience

- **Ankr (2022-2026):** Blockchain/Web3/DeFi; three main products — from ground zero to top performing docs; Developer Experience, Content Strategy, Information Architecture; API/SDK/Webhooks docs, developer docs, end-user docs, UX copy, website content, whitepapers, litepapers, feature announcement emails, product positioning/messaging.
- **MoneyHero Group (2021-2022):** Fintech; Information Architecture; internal documentation: architecture docs, developer docs, dataflow docs, API docs.
- **Forte Group (2020-2021):** Process automation solutions, Kubernetes; Developer Experience, Content Strategy, Information Architecture; API docs, CLI docs, end-user docs, release notes.
- **Wargaming (2018-2019):** Game development and publishing; Developer Experience, Content Strategy, Information Architecture; internal documentation: API docs, developer docs, end-user docs.
- **Gurtam (2013-2017):** Telematics / GPS Tracking / Fleet Management; Developer Experience, Content Strategy, Information Architecture; end-user docs, release notes, UX copy across 20+ products.
